Reasons For Allowance

1. This application has been examined. The amendment filed 8/17/05 has been entered.

2. The following is an examiner's statement of reasons for allowance: The cancellation of the rejected claims 75-82 places the application into condition for allowance. New independent claim 98 (apparatus) has the same features of previously allowed independent amended claim 89 (method) of the java based applet program retrieving chart data using http protocol over a web server, wherein the chart data relates to a price history for a company stock, presenting the chart data in graphical form in the window for viewing as a visual historical price chart for a company stock, and providing a set of user selectable commands within the window for permitting the user to annotate the visual historical price chart directly at the client computing system with one or more annotation items which include at least one of trend lines and/or descriptive text labels provided by the user, and modifying the display data directly at the client in the window data buffer based on the user annotating the historical chart, and wherein the user can see both the visual historical chart as well as the user supplied annotation items in the browser window program using the modified display data. The features combined are not set forth in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
